#### Pathetic Death of Alan Hyland

The friends of Mr. and Mrs. Wm. Hyland of Rosemont will be grieved to hear that the angel of death has entered the happy home and carried away their infant son Alan Dale, born to them on the 2nd. of December 1921 after a short visit of eight months the little soul fled back to its Heavenly Father.

Many sympathetic friends were present to render their assistance during the brief illness, the sad event occurring on the twenty-fifth day of August. Among those sending wreaths were:  
Mr. A.D. Whitney and family a wreath  
Mother, Father and Sister a sheaf  
The Masons a sheaf  
Clarence Bateman a sheaf  
Mr. and Mrs. Mouda a spray  
Mr. and Mrs. DePew and family a spray  
Mr. and Mrs. Rolfe and family a spray  
Mrs. Anderson a spray  
Mr. and Mrs. F. Henderson a spray  
Miss Robinson a spray

#### Card of Thanks

Mr. and Mrs. Hyland wish to thank those sympathetic friends who so kindly rendered their assistance during the late illness of their little son Alan Dale and those sending flowers at the funeral.

Mr. P.J. McInerney, leaves after the harvest this fall for Mt. Algin, Ont. to visit his little daughter.

It will be remembered that about two years ago Mrs. McInerney returned to Mt. Algin to her parents where she underwent an operation from which she never recovered, since then her little daughter has been staying with Mrs. McInerney's parents.

Miss Duffy left last Monday for New Dayton, as teacher there.

Mr. Franks, traveller for the Grain Growers Guide, was in town last Monday.

#### Wedding Bells

**Alfred Millar and  
Mrs. McKenzie, Married**

Mr. Alfred Millar and Mrs. McKenzie were married on Wednesday evening at 8.30 on September 6th. by the Rev. C.G. Hockin at the home of Mr. and Mrs. A.C. Russell, who live about two miles south of town.

After the ceremony, a dainty Wedding Lunch was served.

"The Bow Island Review" extends its heartfelt congratulations both to Mr. and Mrs. Alfred Millar and sincerely hopes that they will have a "Long, Happy and Prosperous married life," and may all their troubles be only little ones.

#### Your Own News

If you would like to see any news appear in which you are interested, just send it along to the "Bow Island Review" at Bow Island, Alta.

If it is only News you send us, it will Cost You Nothing—but Advertisements have to be paid for at our usual Rates.

When sending us any News, please be sure and give your Full Name and Address, not for publication unless you wish it.

Mr. Fitzpatrick of Lethbridge is relieving Mr. Turner at the Bow Island station as assistant agent, Mr. Turner is now night operator at our usual Rates.

#### Preserving Fruit

A car of Preserving Fruit will arrive about September 12th.

Extra Pine Fruit at real preserving prices. You would do well to leave your order with us, so you will be sure of getting what you need from this car.

Call and get our prices.  
HOBSON'S General Store,  
Main Street—Bow Island

Mr. Velez who is living 14 miles South of town, has leased Mr. Hunt's farm and is going to move there soon.

We are all very pleased to see Mr. John Skill from Spokane, Washington, he is an old timer around these parts and arrived here last Sunday night to look after his interests, and visit his son Mr. Elmer Skill.

#### Bargains In Non Skid Tires

We have  
30 x 3 1/2 Non Skid Tires at  
\$10.00 each.

This is a Money Saver  
for You.  
Come in and see them

at  
Wilmott & Henderson's Garage  
Bow Island

Mr. and Mrs. James Wallwork and children of Lethbridge, arrived in Bow Island, last Saturday to take up their residence here for a few months. Mr. J. Wallwork is running the Pusher on the C.P.R.

Mr. J. Pollitt left last Friday night for Medicine Hat returning Saturday morning.

More Bow Island News on  
Middle Page

Mr. and Mrs. Wm. Dempster are back in Bow Island again, and will move into the house recently occupied by Mrs. Robinson.

Majorie Duffy and Sadie James have gone to Medicine Hat to attend High School.

The Women's Institute are putting on a Reception to-night, Friday for the teachers of the Bow Island School and parents of the children, in the I.O.O.F. Hall.

We are glad to report that Mrs. Browning is now feeling a little better from her attack of asthma.

"The Review" offers hearty congratulations to Mr. and Mrs. Maurice Gibbons of Maleb, upon the arrival of a bonny baby girl, born Wednesday night 6th. of September at Mrs. Hubbard's residence in Bow Island.

Miss Audrey Baine is visiting at Cayley with Miss Oral Laidke.

Mr. and Mrs. Geo. Candler made a trip to Medicine Hat yesterday Thursday.

Miss Doran left for Raymond Monday as teacher there.

## To Holders of Five Year 5 1/2 per cent Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922.

### CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5 1/2 per cent interest, payable half yearly, of either of the following classes:

- (a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.
- (b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Dated at Ottawa, 8th August, 1922.

W. S. FIELDING,  
Minister of Finance.

## Canadian Pacific Railway Excursions To Eastern Canada

The Canadian Pacific Railway will run "Excursions at Excursion Fares" from Alberta, Saskatchewan and Manitoba to All Points in Eastern Canada during December and early January to afford an opportunity to the people in these Prairie Provinces to visit Eastern Canada.

You get "Courtesy and Comfort" when you travel by the Canadian Pacific Railway.

"Excursion Rates" will be gladly given by any C.P.R. Station Agent.

Local Agents are:

L. M. Cullen Bow Island  
W. H. Grant Winnifred  
C.W. Hendershott Burdett

A Holiday will do you good and these "Excursions" will give you a splendid chance to see the "Sights" of Eastern Canada or to be with the dear old Folks at Christmas.

They will just love to see you  
Don't disappoint them

### The Futility Of Strikes

The Great War taught the world the futility of war. Those nations which started and lost the war are prostrate, while those which in honor were forced to engage in the struggle and who won the war are doomed to struggle along under burdens of debt and obligations which it will require several generations to pay. And, after all, what did the Great War really achieve for the benefit of mankind? Nothing, unless it be that at long last the human family has learned the futility of war, and the absurdity of trying to maintain peace by this making of feverish and gigantic preparations for war. The creation of the League of Nations, the establishment of an International Court of Justice, and the signing of disarmament treaties, all seem to indicate that the lesson has been learned.

But while statesmen, capitalists, and labor are all agreed that war is a curse and that no effort must be made to prevent its recurrence, the catastrophe which overtook the world in 1914, each and all of these three main groups in the industrial world seem content that the age-long struggle between capital and labor, employer and employee, should continue to be waged with the same old, same old "strike" as the chief weapon. Yet, surely in this presumably enlightened century, and with all the experience of the past as a guide, the able leaders in the political and industrial life of the world must realize, and do realize, the utter futility of "strikes" as a means of obtaining redress of grievances and the accomplishment of permanent reforms.

Take the present outstanding example of the use of the "strike" weapon. Last Spring hundreds of thousands of coal miners in the United States went on strike in order to enforce their demands in a controversy with the mine owners and operators. The result was a loss of millions of dollars to the nation, not so far as this article is concerned, in any way interested. Needless to say the right is not all on one side and the wrong on the other. But for four months now the nation has been suffering from the lack of coal, and the result is a national calamity, the cause of which has been the strike. The result is a national calamity, the cause of which has been the strike. The result is a national calamity, the cause of which has been the strike.

For five months now no wage checks have been coming in to support these men and their families probably a total of more than two million dollars, and provide them with the comforts and necessities of life. They have had to depend on the meager doles of "strike" pay out of Union funds which have been deducted from their income in previous years. In the final analysis, therefore, these five months have been worse than absolutely lost to these hundreds of thousands of people.

The mine owners have suffered through deterioration of their properties and machinery, and through loss of profits on operation, but their loss has been small compared with that of their striking employees because the coal still remains in the ground to be mined at some future date and, in all probability, at a higher price because of the shortage created by nearly half a year of non-production.

Countless thousands of other workers have been forced to work on short time because of lack of sufficient fuel to keep the industries and factories in which they were employed operating full time. Railways have been forced to reduce the number of trains in operation and schedules have been lowered. Ocean going vessels have been compelled to carry surplus coal from foreign ports to enable them to make the return voyage because they could not get coal at American ports. While the people of the North American continent are faced to face with the problem, not merely of keeping the wheels of industry revolving, but of actually keeping themselves from freezing to death in the months to come. Such coal as may be available will, it is feared, be an almost prohibitive price.

There are many other losses to be charged up against this "strike," as, for example, the loss of business to merchants everywhere in the mining regions because of the loss to the State resulting from the necessity of maintaining increased forces of police and military to maintain order when tens of thousands of people are living in idleness and suffering from a sense of wrong and injustice.

And what can possibly be written eventually on the other side of the ledger to offset these enormous losses? The strike will be settled sooner or later, and almost certainly in a compromise of some kind. That compromise could just as well have been reached in a conference by arbitration before the strike as now after months of suffering and loss. Even should one side gain everything for which they are holding out, that gain will not begin to compensate for the loss.

Industrial war waged through "strikes" is just as senseless, just as futile, as war waged between nations. Both bring suffering, sorrow and loss in their train, and practically no gain. But capital and labor both remain blind to this fact; each continues to see its side but the other and maintain their positions of mutual antagonism and fearfully and apparently have not the courage to grapple with the theory problem and provide by law some method which prevents the repetitions of this same folly. It must be ended eventually, but apparently it is going to take some industrial upheaval comparable only to the Great War to bring the people of the world to their senses, and cause "the public" to bring in their might and say "this thing has got to stop."

#### Extra Distance

The senator took a taxi to his home in the outskirts of Washington. It was a rainy day. He protested when the driver demanded an extra fare. "Why," said the senator, "you are charging me for four miles, while the distance is but two and a half miles." "It is as a rule, sir," admitted the taxi driver, "but, you see, we missed the quite a bit."

#### Hot-Hedged Men

During the hottest part of one of the hot days in London the sight of men wearing silk hats suggested to an American visitor an inquiry what the temperature under one of the hats might be. The tourist got him a "lie," hung a small thermometer in it and wore it for ten minutes. The thermometer then recorded a temperature of 107.—Youth's Companion.

### Weekly Newspaper Readers Valuable Service Has a Field of Usefulness Peculiarly Its Own

The important services which the country weekly renders its community by publishing timely agricultural news, was emphasized by W. A. MacLeod, Commissioner of Publications for the Saskatchewan Government, in an address delivered by him at the Western Publishers' Short Course and Conference held recently at the Manitoba Agricultural College.

There is a vital distinction between the news field of the weekly paper and the daily, the speaker stated, as the daily newspaper deals very largely with what might be described as "bad news," wars, revolutions, murders, accidents, calamities of one kind or another, and the weekly newspaper, dealing largely in local activities, appeals most to its readers when it depicts most of its space to "good news" information about the social life and the progress and development of the district and community, and in an agricultural community the agricultural news sent out by the Federal and Provincial Governments provides very great interest to its readers.

Illustrations were given of how the value of agricultural news sent out in the form of bulletins or news articles may be greatly increased when the editor gave the article a local color by adding to the article some news of local conditions concerning the subject.

Information about the best varieties of cereals or forage plants is of far greater interest to readers if the editor can add to the article some news of local conditions in the district. The speaker stated that the value of the editor can give accurate information as to local conditions in the district. The speaker stated that the value of the editor can give accurate information as to local conditions in the district. The speaker stated that the value of the editor can give accurate information as to local conditions in the district.

The value of pictures to illustrate text was also pointed out, but the only way in which illustrated agricultural articles could be used by the average country weekly was when they run in the read-print portion of the paper, and the speaker expressed his pleasure at the cordial cooperation extended by the read-print company which supplied the read-print for the majority of weekly papers in the prairie provinces in publishing cut to show the best methods of identifying various insect pests and methods of control.

In closing the session was made to the very great demand made upon the small space available in the average country paper, and it is the speaker's hope of condensing the news articles as much as possible to make them available for weekly papers as the editor would be expected to use the space and prepare the articles as well. The weekly press of Western Canada was the most valuable in the quantity of valuable and timely farm news carried in its local pages.

#### Ottawa Government Pleading Thirty-Nine Survey Parties in the Field

The Ottawa Government is to be congratulated on taking practical steps to aid in developing Canada's natural resources by placing thirty-nine survey parties in the field in the hope of finding new deposits which will be the means of furnishing employment and railway tonnage. These parties are to go to work in every province and the territories as well, including the Yukon. These uncovered resources will prove when opened up, to add much to the wealth of the Dominion and will tend considerably to increase our prosperity. A commendable feature of the policy is to confine the work of investigation to territory within reasonable distance of transportation routes rather than send parties into remote districts.—Montreal Herald.

From a literary point of view, fame consists in having people who know you have written a lot of things they haven't read.

An iceberg that floats 300 feet above the water stretches 700 feet below it.

Every knock one man gives another is intended for a boost for himself.

### To Exhibit Alberta Tar Sands

Samples Are Being Sent to State Fairs in U.S.

Samples of Alberta coal and the famous Athabasca tar sands will be included in the exhibits of natural resources that will be shown at the four state and interstate fairs across the line. While the bulk of the displays thus being made for public's sake will be agricultural in character, it has been decided to show something also of the province's mineral wealth, and there will be some big pieces of coal, chosen from several mines in both the northern and southern mining fields, together with a generous portion of the bituminous sand-stuff.

Pictorial displays of the province will also be included in the pictorial section of the exhibit. These will be interspersed with the elaborate showing of natural pictures now being prepared for the purpose, and will give a graphic idea of the under-pinnings of the province's resources, as well as of its agricultural resources.

### POSSIBLY YOUR OWN WIFE

She may not look so young and pretty as she used to be. If her cheeks are hollow and pale, if she is tired and nervous, her system needs good food. Her health is being ruined by neglecting the bloom of health to which girls and women. Her health is being ruined by neglecting the bloom of health to which girls and women. Her health is being ruined by neglecting the bloom of health to which girls and women.

#### Course in Bee Husbandry

The University of Saskatchewan is to have a new department, and a course of bee husbandry will be included in the curriculum of agrarian students this fall. The University authorities have enlisted the aid of J. H. Bayford, Vancouver, B.C., who in 1921 gathered 92 pounds of honey, worth 70 cents a pound.

The tongue of the chameleon is as long as its body.

### SUMMER HEAT HARD ON BABY

No season of the year is so dangerous to the life of little ones as it is the summer. The excessive heat throws the little stomach out of order so quickly that unless prompt aid is given the baby may be beyond all human help before the mother realizes it. In summer is the season when diarrhoea, cholera infantum, dysentery and colic are most prevalent. Any of these troubles may prove deadly if not promptly treated. During the summer months the best friend is Baby's Own Tablets. They regulate the bowels, sweeten the stomach and keep baby healthy. The Tablets are sold by medicine dealers or by mail at 25 cents a box. Write Dr. Williams' Medicine Co., Brockville, Ont.

When a woman tries to capture a weathly husband she evidently finds that his means will justify her ends.

### Plans Taking Movie of Mars

Planet Will Be Only 34 Million Miles Away in 1924

Dr. David Todd, Emeritus Professor of Astronomy and Navigation at Amherst College, is planning to take a moving picture of Mars. Mr. Todd is collecting the instruments required and will shortly proceed to Fort Charlotte, Nassau, in the Bahamas, where his experiments will be conducted.

In 1924 Mars will be nearer to the earth than it has been for 500 years, and according to astronomical calculations, will be nearer than for the next 500 years. Therefore all students of astronomical science are anxious to become as well acquainted with this vast planet as possible.

Ordinarily Mars is fifty-three million miles from the earth, in August, 1924 she will be comparatively close, and only thirty-four million miles distant.

This attempt to make pictures will be carried out with a special camera equipped with a rare mirror five feet in diameter and of the same diameter and weight. The pictures are to be taken, not directly, but from the image thrown on the mirror from the base of the telescope. The camera cost \$3,000 and the mirror was made by Pennsylvania engineer, who, at his death, gave it to the American University in Washington.

If successful films are made, Dr. Todd thinks they should be available for motion picture houses.

Professor Todd is convinced that no life exists on Mars. He points out that the two main questions to be solved are: Whether the planet is habitable and whether it actually is inhabited. Personally, he holds that it may have harbored plant or animal life at one time, hundreds of thousands of years ago. He discounts the idea that radio-communication could be established there, because of lack of anyone to receive messages and the fact that Mars is so far from the earth that its present stages of development, the wireless would be inadequate.

### THOUSANDS CONVERTED

Through ignorance, many have suffered agony and pains long thought incurable. But doubt quickly turns to belief when scatica, lumbago and neuralgia are healed with Nerviline. Its soothing healing powers are really wonderful. Nerviline sinks in quickly and brings grateful relief. The hundred and one minor ills that come to every family yield quickly to Nerviline. Try it. 35c at all dealers.

### How Far Can You See?

Details Cannot be Distinguished 600 Yards Away

When it comes to judging distances the average man is apt to go sadly astray.

Careful tests show that the following are distinguishable at 100 yards: The parts of the body, slight movements of the head, arms, or legs, and the details of dress.

Let him stand 100 yards away and his face becomes almost a blur, it being impossible to distinguish the features.

Let him stand 400 yards away and his face is a speck, but it is still possible to perceive movements of the legs or arms. When he is 600 yards away he is merely a form.

#### Grant For Alberta

The Federal Government has endorsed a grant of \$66,965 to the province of Alberta "for the purpose of aiding and advancing the farming industry by instruction in agriculture."

The payment will be made from the revenue fund of Canada for the year ending March 31, 1925, and under the authority of the Agricultural Instruction Act.

#### Nothing Could be More Appropriate

than such a present, which commemorates the comradeship of those memorable months. Wedding presents are too often conventional rather than personal, but perhaps the gift of the Prince will set a new fashion. This silver figure will always remind Lord Louis Mountbatten, as no cigarette case or tea set could do, of the experiences they shared together. Such a gift shows that the Prince is not only a cousin but also a friend.—From the Overseas Daily Mail.

## Precautions Are Taken To Protect Mines By Nova Scotia Government

Halifax, N.S.—Hon. H. E. Armstrong, Minister of Mines and Public Works in the Nova Scotia Government, announced that the Provincial Government had decided to man the pumps of the Nova Scotia mines threatened with flooding. They will work under the protection of the agricultural provincial police, who will have the power to call in the militia. Mr. Armstrong said the Government was taking these steps in order to protect public property.

A provincial police force of 7,000 men will be organized to protect the pumpmen in the Nova Scotia mines, said Mr. Armstrong. Its sole purpose will be the protection of public property and maintenance of law and order, he said. Proclamations have been issued giving the new body jurisdiction in the place, river, Waterford and Dominion and other Cape Breton county areas, where the collieries are declared to be falling victims to inflowing water.

Lieut-Col. Eric MacDonald, of Wolfville, N.S., has been appointed commissioner of the provincial police and will start recruiting in Halifax. The men will be stationed in groups, and each group of about 10 will have a magistrate with them who will have the power of reading the Riot Act and of calling in the aid of militia.

Asked who would be responsible for Mr. Armstrong said it would probably be done by company officials or perhaps some of the union men, would aid in order to prevent a strike. There was no question of strike breaking, he said; it was a matter of protecting public property. The provincial police would give all the protection possible to the men doing this work.

The Minister said the Cabinet was prepared to take very drastic steps to prevent coal 'proletarianism' from getting out of hand. He said that the Government would be prevented from doing so, Mr. Armstrong said, even if it were necessary to cancel the lease of the mine owners supplying them.

### Dublin Silent While Leader Is Buried

All Activities Suspended During Funeral of Arthur Griffith  
Dublin—Ireland buried another of her distinguished sons. Arthur Griffith was laid to rest in historic Glasnevin Cemetery, after services of impressive solemnity in the beautiful cathedral of the Immaculate Conception. Many attended the Requiem High Mass for the departed leader, and of the departed leader celebrated with all rites and ceremony of the Roman Catholic Church. The cathedral was crowded, and the thousands stood in the streets outside looking in as nearly as possible the service they could not see.

All activities in Dublin were suspended during the funeral.

#### Mount Robson Scaled

Edmonton—Windsor Pritchard, of San Francisco, with Harry Harrington, Canadian guide, reached the peak of Mount Robson recently. This is the second time in history that Mount Robson has been climbed. It is the highest point in the Rockies.

## Plan Ways And Means To Assist Farmers In Marketing Grain

Regina—The Federal Government might assist farmers by calling a conference of bankers to devise ways and means to enable farmers to hold their grain long enough to prevent the usual fall glut of the market with its consequent flattening of prices.

This in effect is the suggestion voiced by Premier Charles A. Dunning to Premier King in reply to the latter's telegram offering the cooperation of the Federal Government in the portion of measures as a substitute to the Wheat Board that the latter has fallen through and asking for further suggestions from both Alberta and Saskatchewan Governments.

At the same time Mr. Dunning announced that he could call another conference this fall of creditor classes other than bankers with a view of securing their cooperation by extending leniency to farmer debtors. Mr. Dunning pointed out, however, that the banks could not be asked to do this, and to come to an agreement with the bankers would entail mediation by Dominion authorities.

## World Mourns Death Of Lord Northcliffe

Messages Significant of Esteem in Which Publisher Was Held

London—World-wide regret at the death of Viscount Northcliffe continues to be evoked by the flood of telegrams and cable messages received by the family and published in Northcliffe papers. The messages sent to Lady Northcliffe by the King and Queen and other members of the Royal Family and the tributes from President Harding are significant of the esteem in which the great publisher was held, says the Times.

### Has Not Marred Canadian Cheese Trade

Dover Affair Has Been Entirely Forgotten in England

Ottawa—The analyst found nothing to indicate that the cheese was the cause of the illness, and the illness itself was not in any case serious. This statement was made by J. A. Rudick, Dairy Commissioner, who is just back from an official trip to Great Britain, in regard to the report that some Canadian cheese had caused the sickness of a number of residents of Dover.

Mr. Rudick stated that as soon as he learned of the report, he had it thoroughly investigated. "The matter," he said, "apparently attracted more attention in Canada than in the Old Country. The case has been entirely forgotten there and has done no harm to the trade in Canadian cheese."

### American Judge Is Suspicious

Thinks Many Canadians Obtaining Divorces in Detroit Evading Law  
Detroit, Mich.—Convicted that hundreds of Canadian are obtaining divorces in Detroit every year by falsely representing themselves as residents of the city, Judge Richter has ordered Edward Pokorney, clerk to the court, to investigate the residence of every Canadian who files suit for divorce.

"I will not grant a decree in any Canadian case until Mr. Pokorney assures me that one of the parties has really lived here two years as required by the statute," said Judge Richter. "So many suits are being filed by Canadians that it has made me very suspicious."

### Reparations Body May Be Discontinued

Rumors that British Member Is About to Resign

London—Possible discontinuation of the reparations commission is overshadowed in a Paris dispatch to the Times, which alludes to rumors that the British member of the commission, Sir John Bradburn, is about to resign.

It is common property, says the dispatch, that Sir John will cease his connection with the commission in November and he may not be easily persuaded to remain. In such case, it is added, there probably will be no further resignations, and it will be impossible to keep the commission in existence very long.

### WESTERN EDITORS

F. C. Norris, Editor and Proprietor of The Mercury, Elkhorn, Manitoba

### Agree With Premier Poincare

Stand Taken at London Conference Is Approved by French Cabinet

Bienhouville, France—Sitting under the presidency of President Millerand, the French Cabinet at its session here gave unanimous approval to the attitude taken by Premier Poincare at the recent conference of Allied Premiers in London, and also discussed the question of a moratorium for Germany.

On the matter of a moratorium, it was decided to await the forthcoming decision of the Reparations Commission, but plans were perfected regarding the measures to be adopted should the decision of the commission fail to agree with the French viewpoint.

Another decision arrived at was that for the time being the Government need not call an extraordinary session of Parliament, so that the deputies and senators might be acquainted with the exact situation and the programme of the Government.

### Resents Criticism Of American Surgeon

Canadian Should Standardize Canada's Hospitals, Says Dr. McKeown

Toronto—"If it is necessary to standardize the hospitals in Canada, it should be done by someone in Canada." This was the reply made by Dr. Walter McKeown, of St. Michael's Hospital to a criticism of Ontario hospitals made by Dr. M. T. McEachern, director of the American College of Surgeons.

Dr. McKeown continued: "We have to look to the American people and to such institutions as the Carnegie and Rockefeller Foundations."

### Three Hurt in Mine Accident

Glouce Bay, N.S.—William Cameron had a leg broken, Joseph McNeil received injuries to the head, and Daniel MacDonald was badly shaken, when the car in which they were about to descend into No. 2 mine at New Aberdeen was upset, and instead of down and struck violently against the head of the cage shaft. Safety catches prevented it from plunging to the bottom of the 950 foot shaft.

## May Be Necessary To Make Some Change In Immigration Laws

### Railway Board Itinerary

Ottawa.—Arrangements have been completed for the fall circuit of the Board of Railway Commissioners. The following is the itinerary: Quebec, September 4; Saskatoon, September 8; Edmonton, September 11; Jasper, Alberta, September 12; Leduc, B.C., September 12; Hazelton, B.C., September 13; Victoria, September 18; Vancouver, September 19; Kamloops, September 22; Nelson, September 25; Lethbridge, September 27; Calgary, September 28; Regina, September 30; Winnipeg, October 2; Fort William, October 4.

### Ontario's Provincial Bank

People Have Deposited One Million in Six Weeks

Toronto.—The province of Ontario Savings Department has written one of the "most" worth of business in the first six weeks in operation. Over 100 representatives of the Assured Savings Branch of the Provincial Bank held a dinner last week and reviewed the work, which has been sensational in Ontario.

Comments have been showing upon the staff of Ontario's Bank for their energies which have attracted thousands of citizens. Mr. McKenna, director of the Province of Ontario Savings Department, told of the initial obstacles which confronted the new members, and said the loyalty of those who launched the project was responsible for its huge success in so short a period.

### Disastrous Fire At Barons

Post Office, Postmaster's Residence and Implement Store Destroyed  
Calgary, Alta.—A special despatch to the Herald, from Barons, Alta., says:

Fire completely destroyed the post office, residence of the postmaster, and the Barons Implement Company's warehouse and store. The implement store and stock valued at \$20,000, very little insurance being carried. The post office and residence of Postmaster Andrews, were valued at more than \$5,000, and were fully covered by insurance.

### German Debt Increase

Berlin—From August 1 to August 10, the floating debt of Germany increased 4,500,000 marks, the average for the last date 213,400,000 marks.

## No Immediate Sign Of Settlement Of The Railway Wage Dispute

Montreal—Rail shoguns throughout the Dominion are on the verge of revolt as a result of the attempt of Canadian railways to cut their wages on an average of seven cents an hour, Frank McKenna, Vice-President of Division No. 4, Railway Employees' Department, of the American Federation of Labor, told the Conciliation Board.

Again the rail executives opened the door to a shaming in a statement by George Hodge, Assistant General Manager of C.P.R. eastern lines, to the effect that Canadian shop employees were in a better position than similar workers in the U.S.

In a sharp reply the labor representatives not only denied that statement but charged the railways with placing the importance of balancing their budgets higher than the question of justice to human beings.

The union heads asked that the railways produce their budget to support their claim that a wage slash was necessary to the railway's existence and later the laborers supported their point by declaring that while the railways wanted to cut wages they were not cutting the wages of the operating or executive staffs nor had the dividends been cut.

Ottawa.—The Canadian National Railways have agreed to suspend wage reduction in the case of the railway clerks and other members of the Canadian Brotherhood of Railway Employees until after the Board of Conciliation has investigated this dispute has made its report, it was announced by A. E. Crilly, assistant to the general manager.

Montreal—A preferential immigration treaty between Canada and Great Britain promises to be the Canadian organized labor's proposal to the Federal Government as a means of stemming the flood of industrial workers from Europe.

Before the opening of the thirtieth annual convention of the Dominion Trades and Labor Congress, delegates from all parts of the Dominion were comparing their views on the three main issues, which the congress state: Immigration, unemployment and a revision of the Industrial Disputes Act. In all these unofficial sessions the immigration topic was paramount, as it is generally held as inseparable from the unemployment situation.

Not only do the great majority of the delegates who will fill the floor of the convention demand almost complete closing of the immigration door to Europe, but they will find a staunch leader in Tom Moore, the President of the Congress, whose views are said to crystallize the majority opinion.

To the Canadian Press Mr. Moore outlined the menace which the Canadian international trades union movement reads into a winter of industrial uncertainty aggravated by a steady influx of aliens from overseas.

"Just as Canada, in appreciation of her position as a dominion within the British Empire," he said, "saw the need of a preferential trade policy with the Motherland, so, too, must be seen a 'check on unrestricted immigration, much of which inevitably drifts into industrial centres, is needed."

"We do not mean to close the door entirely to the British Isles, as much of our national strength, in fact the strength of our Empire, depends to a large extent upon the exchange of people from one part to the other. We need the good, healthy, British stock here, but we must restrict the general flow to the Dominion, and the solution appears to lie in a preferential immigration treaty."

Exchange Flour For Welsh Coal  
Wells, Ont.—The Maple Leaf Milling Company has arranged to take a load of flour to Wales, and on returning the cargo will consist of Welsh coal in order to ease the local fuel situation. The matter was given hearing in the City Council meeting last night, and the Milling Company commended for its efforts.

### HE WOULDN'T SAW THE MOOD

From Our Own Correspondent

Another rain Tuesday just enough to stop threshing, but not enough to help growing vegetation.

Threshing seems to be all the rage just now and it seems as if there had been a change in the season as the wheat is not yet cut and threshing has been going on for a week or more, what around here on the average is from 8 to 10 bushels per acre, and the price less than a dollar. We are wondering how are the Farmers' Debts to be Paid?

Miss Alice Penstock has been asked to teach the Maxwell School this term and has just commenced to run a new car, hope she will make good both with teaching and learning how to run a car.

The Pawn School commenced on the fifth and we hope will be a success.

Miss Elizabeth Trefy lately of Hanna but now visiting her parents at Medicine Hat, came to Winnifred to spend a few days with friends. She has been called to Wash. D. C. to act as stenographer in one of the important offices there; and we feel she will fill the place with credit, we wish her well.

Mrs. Harry Luther is home from the ranch and all her friends are glad to see her and Katherine.

Wednesday 6th. 52 " Sunny  
Thursday 7th. 52 " Cloudy, rain in afternoon

**WINNIFRED NEWS**

During the week all rigs will be busy threshing and wheat hauling will be general. Many are cutting late grain. Reports from a few who have threshed last week, are that the yield will average very small, 6-8 and 10 bushels per acre so far, elevators are seemingly busy, moisture is needed badly for fall plowing, by the end of the week ending Sept. 9th, a good report can be given of the average yield of wheat per acre for the 1922. Crop weather, Sept. 8th, and 9th, is perfect.

Mr. Geo. Barber, manager for the Lake of the Woods Milling Company, spent Saturday evening and Sunday Sept. 3rd, at the farm of J.W. Dennison farming has a tendency to attract Mr. Barber, and he is planning on being engaged in plowing and tillage work soon.

Winnifred Union Church hours of meetings have been changed, services will be held at 3:30 p.m. Sunday School and Bible Class at 2:30 p.m. until further notice, the change beginning Sept. 3rd. You are invited  
Rev. Wm. M. Rodger, Speaker

Mrs. Joe Fisher is moving out of her son Harry's house, back to the farm east of town, the house has been rented by a young couple as soon as they are united in marriage same will be occupied.

Miss Thelma Long left for Medicine Hat Sept. 4th, to attend High School for another term.

Miss Inez Backstrom returned to St. Theresa Academy at Medicine Hat for this year term also taking music lessons again, she is getting along remarkably well as a pianist.

Miss Myrtle Thorson left Sept. 4th, to attend Business College at Medicine Hat.

**BOW ISLAND NEWS**

Continued from Front Page

Mr. H.B. Miles, Divisional Engineer for the C.P.R. at Lethbridge was in town on business last Wednesday Sept. 6th.

Mr. A.C. Gage was suddenly called to Hider, North Dakota, by the serious illness of his father. Mr. Gage left Tuesday morning, Mr. E.C. Gage has also gone to see his father.

Meosers, Herb Skewton, Del Burnham and C. Henderson went on a duck hunt last Friday the 1st, bringing back quite a bunch of ducks.

Mrs. B.T. Whitney and son Thompson accompanied by Mr. Nicoll went to the ranch at Manyberries, by auto last Sunday, returning to Bow Island on Tuesday morning.

Mr. and Mrs. Swennumson motored to Medicine Hat last Sunday and were entertained to dinner by Mr. and Mrs. McDougall, and Mrs. Swennumson was visiting there until yesterday Thursday, and says she had a delightful visit.

Meosers, A. Swennumson and R. Beatty motored to Combs yesterday Thursday.

C.G. Hockin, Pastor

Mr. and Mrs. Arthur Stevens and son also Mrs. Stevens Sr. of Mabel, were business visitors to Bow Island last Saturday.

It is reported that Mrs. Duncan Millar is very seriously ill in a hospital in the States.

Mr. Wright accompanied by Greta Ostrom and Heatrice Field were out motoring last Sunday.

Mrs. Hurlbut went out with Mr. Tom Conquerquod to Mabel, on Saturday the 28th. Aug. to visit with Mrs. Sutherlands living near Foremost on Sunday, and was the guest of Mrs. Robert Conquerquod on Wednesday and Thursday going to visit with Mrs. Keen on Friday and Saturday, also visiting with Mrs. Charlie Reynar returning home with Mr. Robert Conquerquod on Monday, to Bow Island, having spent a most enjoyable time.

Mr. Arnold Bruce from Trail is visiting in Bow Island, amongst friends, on the 1st of October train for New Dayton, where he will take charge of an elevator there.

Mrs. Robinson shipped her furniture to Conrad, Montana, on Thursday the 7th. Mrs. Robinson also left Raymond on Thursday where she will visit with her mother before going to Conrad.

We are glad to report that Mrs. R. H. Robertson is feeling much better the past two days.

**Grain Prices**

Local prices for grain here at Bow Island are as follows:

Wheat 71c per bushel  
Oats 28c per bushel  
Rye 46c per bushel  
Flax \$1.40c per bushel

**An Old Timer  
Passes Away**

Mr. Thomas D. R. Millar Dies  
At Age 87

We regret to report the death early last Sunday morning of Mr. Thomas Millar who died at the home of his son Alfred. Mr. Thomas Millar with his four sons came out from Scotland to Bow Island, after his wife's death and took up a farm here where the country was just opening up. All of them working together for a number of years until his sons grew older and took up land of their own, but of late years the father has been living for a time, with each of his sons in turn, he was 87 years of age when death took place and he had been in feeble health for some time.

The funeral took place, on Tuesday afternoon to which a great number of his friends attended. Mr. Millar was well known as he was an old timer in these parts, and large numbers of the old timers were to pay their last respects.

The Rev. C.G. Hockin of Bow Island officiated at the funeral.

Mr. A. B. Cullen of Calgary was visiting relatives in Bow Island over Sunday last.

Mrs. Cyril Smith with her son Percy and daughter Irene, accompanied by Miss Ruby Westlake, motored down from Medicine Hat last Sunday and were the guests of Mr. and Mrs. Browning here, for the day, returning to the Hat the same evening.

Miss Francis Halloran left last Sunday evening for Medicine Hat to resume her studies at the High School.

Master Bob Howgill went out to Mr. McInerney's farm last Monday where he is now employed.

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the name of the Bayer Manufacture of Germany. It is not the name of the active ingredient. When it is used without the Bayer name, it is not Bayer Aspirin. The name "Bayer Aspirin" will be stamped upon their special trade mark, the "Bayer Cross."

## Raffles At Bazaars

## Law Regarding Raffles Held For Religious and Charitable Objects

General Victor Williams, Commissioner, Ontario Police, has issued the following interpretation of the law of Canada regarding raffles at bazaars, for religious or charitable objects, and instructions to the police authorities.

As there is widespread misunderstanding regarding these matters it is well to note carefully what the law is. General Williams says:—

"In view of requests that come from time to time to this department, from charitable organizations for permission to hold raffles, it seems necessary to again call the attention of police officers and of the municipal authorities and the public generally, to the provisions of the law.

"Section 236 of the Criminal Code prohibits lotteries with an exception in favor of raffles (which are a form of lottery) for religious or charitable purposes. The exception is in the following terms:—

"Raffles for prizes of small value at any bazaar held for any charitable or religious object, if permission to hold the same has been obtained from the city or other municipal council, or from the Mayor, Reeve or other chief officer of the city, town or other municipality wherein such bazaar is held, and the articles raffled for thereat, have first been offered for sale and none of them are of a value exceeding fifty dollars."

"It will be observed that the permission referred to is an exception in favor of raffles (which are a form of lottery) for religious or charitable purposes. The exception is in the following terms:—

"Raffles for prizes of small value at any bazaar held for any charitable or religious object, if permission to hold the same has been obtained from the city or other municipal council, or from the Mayor, Reeve or other chief officer of the city, town or other municipality wherein such bazaar is held, and the articles raffled for thereat, have first been offered for sale and none of them are of a value exceeding fifty dollars."

"It will be observed that the permission referred to is an exception in favor of raffles (which are a form of lottery) for religious or charitable purposes. The exception is in the following terms:—

## A Suction Gas Lorry

British Firm Manufactures Truck that Makes its Own Gas for Motive Power

During the war there were to be seen in Great Britain a number of motor wagons carrying enormous gas bags on the roof. These bags were filled with ordinary town gas, which was used as a source of power in place of petrol—then "exceedingly scarce." The results were so far successful that experiments were made

in the storing of town gas under pressure in cylinders, but presently these experiments have not led to any very satisfactory result. At any rate this new substitute for petrol to which refuelling attention is now being given is suction gas, which is produced by drawing air and steam through heated fuel such as sawdust, coke, charcoal, wood chips, brown coal, or peat. Petrol, benzol and alcohol, which generally are still high enough in price to encourage suction gas development and a leading British firm has put on the market a very

well constructed three-ton lorry driven by suction gas. The steam for the suction gas produced is made in a separate generator heated by the exhaust gases from the engine. The producer itself forms part of the chassis and is neatly accommodated in a light steel box at the side of the driver's cab, where it is easily accessible for inspection. Its weight has been reduced to the lowest possible.

After being generated, the gas passes along a pipe to the scrubber, becoming cool on the way. The scrubber removes the tar and the gas then passes direct to the engine, where it mixes with air and drives the engine in the usual way. Tested this winter with a three-ton lorry show that when using anthracite it ran at an average speed of twelve miles per hour at a working cost a little below one-third of that of petrol. This vehicle is specially designed for use in countries where petrol is scarce, but where various types of solid fuel are available at a reasonable price.

After being generated, the gas passes along a pipe to the scrubber, becoming cool on the way. The scrubber removes the tar and the gas then passes direct to the engine, where it mixes with air and drives the engine in the usual way. Tested this winter with a three-ton lorry show that when using anthracite it ran at an average speed of twelve miles per hour at a working cost a little below one-third of that of petrol. This vehicle is specially designed for use in countries where petrol is scarce, but where various types of solid fuel are available at a reasonable price.

## Experimenter Blacklisted

Attempted to Cut Trees With Rapid Fire Gun

Felling trees at Castlebrook, Wash., with a red hot wire and a rapid fire gun to test some new inventions have placed Randall Mayer, the experimenter, on the forest service blacklist.

The wire not only burnt its way deep into a big red cedar trunk but also started a fire that quickly spread to adjoining pitchy timber. The wire was carried to and from rapidly by an electric motor, the best generated by friction being intended to sever the wood tissues quickly and smoothly.

Mayer's other idea was to aim a rapid fire gun into the trunk of a tree slowing turning the muzzle across the diameter. In the experiment the pointed bullets felled a two-foot tree but many passing through the trunk chipped large chunks off other trees and frightened the lumberjacks a long distance off.

The Many-Purpose Oil—Both in the house and stable there are scores of uses for Dr. Thomas' Electric Oil. Use it for cuts, bruises, burns, sores, the pain of rheumatism and sciatica, sore throat and chest. Horses are liable very largely to similar ailments and mishaps as afflict mankind, and are equally amenable to the healing influence of this fine old remedy which has made thousands of arm friends during the past fifty years.

## More Automobiles in Japan

Despite the high tax—\$100 yearly on the cheapest cars to \$1,500 on the higher class ones—despite bad roads and business depression, the use of automobiles is increasing rapidly in Japan. The increase has been particularly noticeable in cars which ply for hire in Tokyo, Yokohama, and other cities, the charge for which is about \$1 an hour.

### BLIND GIRL GRADUATES

Receives Her B.A. Degree From  
Edinburgh University

EDINBURGH - Miss Mary Grace Anderson is the first blind girl to receive a University degree in Scotland. She took the degree of Bachelor of Arts from Edinburgh University at the graduation exercises.

She is 25 years of age, has a pink and white complexion and a pair of the most beautiful brown eyes imaginable. She entered the Royal Blind Asylum school in Edinburgh when six years old. Though deprived of her sight she had a receptive memory, with which was counted a natural aptitude for study.

"I felt a bit at sea when I first went to the university," she said, "but I soon found my feet, and since then I've found it all easy. I liked English and history, but I was particularly fond of mental philosophy."

"The special attraction about it," she whispered blushing, "was that I liked the professor."

### DATES for AUCTION SALES

If you intend to have a Sale, be sure you leave the date at the Bow Island Review For D. M. Garrison - Auctioneer.

## Burdett News

From our own Correspondent

Miss Annie Fulton of Irvine who has been visiting Mrs. Mansfield, left last week for Medicine Hat where she will go to school this year.

Mr. and Mrs. Wm. Reber and son Claude motored last week to Regina, Sask. to visit friends and will go on from there to Saskatoon before they return.

Mr. Geo. Stacey of Lethbridge was a business visitor in town last Wednesday.

Mrs. Frank Vesper and children of Magrath are visiting friends here.

Mrs. D. A. Mansfield entertained a number of young folks on Thursday evening in honor of Miss Gladys Brown who is leaving for Medicine Hat, where she will attend high school this winter taking grade XII.

Mrs. McKinnon motored to Iron Springs for the weekend returning Monday evening accompanied by Mrs. McKinnon and the children.

### Miss Alice Pool Winner Of Gold Medal For Singing

Dr. McCrea of the associated board of the Royal Academy of Music and the Royal College of Music has received a list of the successful candidates, among which is the name of Miss Alice Pool as having won a gold medal for singing, for all Canada.

### School Reopened Last Tuesday

The Consolidated School opened last Tuesday with a full staff of teachers, and a larger attendance than ever, every seat being occupied.

Mr. A.T. Lutz is again in the principal's chair and is teaching Grades VIII, IX and X.

Miss Vera Holroyd, Grades V, VI, VII Miss Helen O. Nesbitt, " III & IV Miss Margaret Cameron, " I & II

Mr. J. McKenzie who has been renting the Maxwell house has moved from there to the "Sam Fletcher" house.

Mrs. Tom Burns and family have moved into town for the winter and will occupy the Maxwell house.

### Mr. A. Hamilton Meets With Nasty Accident

Mr. Alex Hamilton, we much regret to report, had a bad accident last Tuesday, while getting his car ready to drive out, one of the wheels dropped on his foot crushing it badly - Dr. McPhail skillfully attended to it and in our next issue we hope to be able to report a great improvement.

### Baby Clinic on 14th. Sept.

On Thursday 14th. September, Miss West and Miss Wilkin of the Department of Public Health will hold a Baby Clinic under the auspices of the Women's Institute in the Methodist Church at 3 p.m.

All mothers are invited to attend and bring their babies - take advantage of this privilege and make the Clinic a success.

Mrs. G.H. Johnson  
President of the Women's Institute

Mr. and Mrs. W.D. Anderson motored to Medicine Hat on Sunday. Mrs. Anderson has rented a suite of rooms in the Connaught building where she will keep house for her son Robert who is attending high school.

### Valuable Home Is Total Loss

Grassy Lake Residence Burns to Ground - Was Modern Home

GRASSY LAKE, - Emil Wattum's large residence on First Avenue was destroyed by fire last Friday. This was one of best houses in town, built by the late E.J. James-Davies some eight years ago and sold to Mr. Wattum two or three years ago.

It is understood there is some \$4,000 insurance, but this will not nearly cover the loss as this was a well built nine-roomed two-story building, with fine concrete basement and cement claret, and well furnished.

Nobody was in the house at the time, as Mr. and Mrs. Wattum and family are living in the cook car at Emil's threshing outfit. No one has any idea how the fire started. It was first seen to be burning between 10 and 11 o'clock, and when neighbors got there the whole place was ablaze.

The house was built on four lots and surrounded by trees. With a strong wind blowing from the west at the time, it is lucky no other buildings were in the run of the fire. This is a serious loss for Mr. Wattum.

### British M. P.'s In City Of Toronto

TORONTO - The trans-Canada party of British parliamentarians with its escort of Montreal Board of Trade members, in the Canadian Pacific eight coach "Board of Trade Special" reached here about 9 a.m. last Saturday and was duly welcomed by city and provincial officials.

The British visitors with the Montreal men toured the city and inspected the Canadian National Exhibition, passing many complimentary remarks on the big fair.

Representatives of the party were the guests of the exhibition directorate.

### Ford Worth \$409,820,000

LANSING, Mich. - Total assets of the Ford Motor company are \$409,820,182.92 according to the annual financial statement filed in the office of the secretary of state in connection with the corporation tax returns of the concerns that paid the maximum fee of \$10,000. The statement is of June 30th, 1922 and the company's surplus is shown as \$280,932,294.49.

### Big Game Hunters In Alta.

During the past year big game hunters shot 1,046 moose, 98 caribou, 108 mountain sheep, 47 mountain goat, and 1,129 deer in the Province of Alberta, according to the report of the chief game warden. There were 5,230 licensed hunters. Owing to the lack of snow in the early part of the season the hunting was not so good as it would otherwise have been.

### Special Excursion Rates

The Canadian Railways including the C.P.R. have decided to make Excursion Fares from Alberta, Saskatchewan and Manitoba, to all points in Eastern Canada during December and early January to afford an opportunity to the people in prairie provinces to visit Eastern Canada.

## How To Have Long Life Should Sleep With Head To North

PARIS.-If the documents unearthed by a French weekly journal are authentic and if their author carried out the theory he outlined in them, Dr. Vornoff's monkey gland operation to assure long life has received a severe jolt.

The document, which has just been found, is dated 1800 and signed by Dr. von der Fisshelmer, who is reported to have died at the age of 140. In it the doctor gives the following formula for assuring long life:

"When you go to bed always take a compass with you and with the aid of the compass place your bed in such a position that your head points directly north and your feet due south. Sleep soundly in a horizontal position and you will live long."

The doctor explained further that after patient and careful study he had discovered that a body placed in such a position was in a direct line with the various magnetic currents coming from the north which in passing through the body insured regular circulation of the blood and helped to maintain the tissues.

## Money! Money!

Your attention is called to the Advertisement, appearing in this week's Review, about Victory Bonds which can be Converted or Exchanged for new Bonds bearing 5 1/2 per cent interest and an additional bonus of a full Month's Interest.

Also, it will pay you to carefully read over the Advertisement about Government Annuities, the title is "Independence" and it is rightly named, because if You, can and will, follow their advice it will make You Happy and Independent.

## INDEPENDENCE
